

FOR WEALTH, ADVISORY, CPA & TAX FIRMS

3 Highest-ROI Automations for Financial Services

A 4-advisor firm typically loses 25–40 hours a month to client onboarding, document chase, and review-meeting prep. These three builds collapse that into minutes — and free senior advisors to actually advise.

1

Client onboarding workflow

45 min → under 5

Prospect fills a web intake → engagement letter auto-generates → goes out for e-signature → CRM record created with every field populated → kickoff meeting invited. No more duplicate data entry across Redtail, custodian, and DocuSign.

Works with: Redtail · Wealthbox · Salesforce FSC · HubSpot · DocuSign · Schwab / Fidelity forms

2

Secure document & tax-doc collection

20+ emails → 3

Clients upload W-2s, 1099s, K-1s, statements through a branded portal with deadline reminders. Files are auto-named, categorized by document type, and pushed to your tax prep software or workpaper folder. Missing-doc reminders fire without you lifting a finger.

Works with: UltraTax · Lacerte · Drake · CCH Axcess · ShareFile · Google Drive

3

Quarterly review & prep-packet automation

6–10 hrs/week back

Risk tolerance survey goes out on schedule, portfolio snapshot emails at quarter-end, review meetings auto-scheduled with a prep packet generated straight from the CRM. Senior advisors walk into every meeting with the brief done for them.

Triggers: quarter-end · life event flag · AUM threshold crossed · anniversary date

REAL BUILD · MONKFLOW CLIENT

Team Financial Strategies (4-advisor Dallas wealth firm) — onboarding cut from 45 minutes to under 5, with agreements signed and Redtail populated automatically. Built in 2 weeks.
